Work Rights: Full time (Spouse Visa – Unrestricted Work Rights)

CAREER OBJECTIVE:

I am a career oriented hardworking individual with prior experience in fast paced, service focused business. I aspire to obtain a position that provides opportunity for growth and makes best use of my communication, technical and organizational skills as well as experience while enabling further personal and professional development. I am Seeking a challenging position as a Quality Assurance engineer in a dynamic organization where I can utilize my strong analytical & technical skills, meticulous attention to detail, and comprehensive understanding of software testing methodologies to contribute to the development of robust and reliable software systems

Personal Summary:

- More than 4 years of experience as a QA engineer, ensuring comprehensive test coverage and adherence to quality standards.
- Proficient in creating **test plans, test cases**, and **automated test scripts** to effectively verify software functionality.
- Strong analytical skills with the ability to identify defects, perform root cause analysis, and provide actionable recommendations.
- Experience in defect tracking and management using tools such as **JIRA**, **Trello, Azure DevOps**.
- Excellent collaboration and communication skills, working closely with cross-functional teams to achieve project objectives.
- Expert in writing **automation script** for **WEB** application**, DESKTOP** application and **API**.
- Expert in different automation tools like: **Selenium**, **Katalon Studio**, **Cypress**, **Test Complete**.
- Hands on experience on **BDD** (Behavior Driven Development), **DDD** (Data Driven Development).
- Familiar with **CI/CD** (Continuous Integration/ Continuous Delivery) concept and tools: **Jenkins**, **Bamboo**.
- Demonstrated ability to work effectively in fast-paced and deadline-driven environments.
- Continuous learner, staying up to date with industry trends and advancements in software testing methodologies.

Professional Experience:

Sr. Quality Assurance Engineer – Tensis || Ultimo, Sydney (October 2024 – Present)

- Developed and implemented comprehensive QA strategies and roadmaps aligned with Tensis's AI-powered automation solutions and company goals.
- Established and maintaining rigorous quality standards, metrics, and KPIs, focusing on data integrity, security, accuracy, and regulatory compliance.
- Proactively identify and assess potential quality risks, developing strategies for effective mitigation.
- Established robust defect tracking, reporting, and resolution processes, ensuring clear communication and timely fixes.
- Lead the adoption and expansion of test automation frameworks and tools, maximizing automation coverage for efficiency and reliability, especially for data-driven scenarios.
- Implementation of performance, load, and security testing to ensure scalability, responsiveness, and resilience, particularly for critical data.
- Ensure thorough testing of APIs and integrations with third-party systems.

Quality Assurance Engineer – Pen CS || Leichhardt, Sydney (November 2023 – October 2024**)**

- Developing comprehensive **test plans**, **scenario matri**x and **test cases** to ensure thorough test coverage.
- Executing test cases, identified defects, and reported them in a clear and concise manner.
- Collaborating with developers and business analysts to understand software requirements and ensure testing objectives were met.
- Documenting test results, generated defect reports, and maintained accurate and organized test documentation.
- Conducting root cause analysis for defects, providing recommendations for improvements.
- Working closely with cross-functional teams to ensure alignment of testing efforts and project deliverables.
- Actively participated in team meetings, providing insights and suggestions to enhance overall software quality.
- Written **automation script** using **Test Complete** for the functional test cases of desktop application.
- Maintaining knowledge of industry best practices and emerging technologies in software testing.

Test Automation Engineer (Mid-Level) - WeDaedalus LLC || Michigan, USA (July 2022 – October 2023)

- Define and drive the overall **test automation strategy**, considering the application's architecture, complexity, and testing goals.
- Collaborate with QA and development teams to determine which test cases should be automated and which should remain manual.
- Design and architect advanced, scalable **automation frameworks** that are modular, maintainable, and can accommodate complex test scenarios.
- Implement advanced automation techniques, such as **data-driven testing, keyword-driven testing**, and **behavior-driven development** (**BDD**).
- Lead the integration of automated tests into the **CI/CD** pipeline using **Bamboo,** ensuring seamless execution of tests on every code commit and providing rapid feedback to developers.
- Continuously evaluate and improve the test automation process by identifying bottlenecks, inefficiencies, and areas for enhancement.

Test Automation Engineer - WeDaedalus LLC || Michigan, USA (August 2021 –June 2022)

- Developed and maintained a comprehensive test automation strategy that outlined which test cases would be automated, leading to improved testing efficiency and reduced manual effort.
- Designed and implemented an automation framework using tools such as **Selenium** WebDriver, **KATALON** studio and **Cypress**.
- Created and executed automated test scripts for functional, regression, and performance testing, helping to identify defects early in the development process.
- Integrated automated tests into the **Jenkins** CI/CD pipeline, enabling automated testing of every code commit and providing rapid feedback to the development team.
- Mentored junior team members, providing guidance on test automation best practices, tools, and techniques.

Jr. QA Automation Engineer - WeDaedalus LLC || Michigan, USA (March 2021 – July 2021)

- System Testing, State Transition Testing, Regression Testing, Sanity Testing, Smoke Testing.
- Automation Testing with Cypress, **KATALON**.
- Preparing and Executing Automation Test Cases, Test Plans.
- Working with CI/CD Pipeline in **Jenkins**.
- Participating in **Agile Scrum** Rituals.
- Maintaining liaisons with Developers, Business Analysts.

Intern QA Engineer- Olivine Limited || Dhaka, Bangladesh (September 2020 – December 2020)

- Saint Martin - SRS || SDD || User Guideline.
- Learning Management System- SRS.
- Manual testing on S**aint Martin, Prottoyon** web application.
- Manual Testing on **Joy Bangla**, **Circuit House Management System**, **Barta** mobile application.
- Client support.

Technical Skill:

- **Programming Languages**: C#, Java, Java Script, C, C++, Python
- **Version Control System:** GitHub, GitLab, Bitbucket, SVN
- **Database**: SQL Server, MySQL
- **Project Management Tools**: Trello, Jira, Azure DevOps
- Technical Writing
- Software Documentation
- **Web, Desktop, API** automation
- **BDD** (Behavior Driven Development), **DDD** (Data Driven Development), **KDD** (Keyword Driven Development)
- **Automation Tools:** Selenium, Cypress, KATALON, Test Complete
- **Cross Browser Testing Tools**: BrowserStack, LambdaTest
- **API Testing**: POSTMAN
- **Performance Testing**: JMETER
- Other Tools: MS Office

Education:

BSc in Computer Science and Engineering - 2020
CGPA: **3.77/4.00**
American Internation University, Bangladesh (AIUB)
